

Majestic Etch Remover

Marble Etch Remover is a special blend of polishing compounds formulated to remove light etching and water stains from polished marble, travertine and limestone. Marble can be polished with ease without the use of special tools leaving a beautiful shine to your stone surface and keeping it looking like new.

For Use On: Marble, travertine, terrazzo, limestone and onyx

Available Sizes: 8 oz. bottle, 1 lb., 10 lbs., 25 lbs.

Product Features:

- Maintains a beautiful and natural look for your natural stone surface
- Removes light scratches and etch marks
- Liquid formula eliminates irritating dust unlike other polishing products
- Easy to Use!

THOROUGHLY TESTED

Directions:

Note: Contents are by weight, not volume. Bottle is approximately half filled with product in order to allow for easy mixing of paste and liquid prior to use.

Directions: STIR PRODUCT WELL WITH STICK. Always test a spot first. For deep etches and scratches professional stone restoration may be needed. Wear rubber gloves and make sure not to get paste on adjacent surfaces. For best results, first clean area to be polished with Majestic Neutral Cleaner.

1. Working one area at a time no bigger than a 6-8 inch area, apply a small amount (about one teaspoon) of paste to dull area.
2. Use a white terry cloth or a white polishing pad and work the mixture in a circular motion. Add water as necessary to maintain a wet slurry.
3. Remove slurry with a clean cloth and check to see if polish is restored.
4. Repeat as necessary.
5. Once the shine is achieved, clean area with Majestic Neutral Cleaner to neutralize.
