

Majestic Honing Powder

Majestic Honing Powder is a balanced blend of selected inert powders (non-acidic/non-alkaline) designed to remove medium scratch patterns and severe chemical etching. Honing Powder produces a non-slip finish and leaves a superior shine. Available in 150, 250, 400, 800 and 1800 grit.

For Use On: All natural stone surfaces. Always test a small area to check for desired outcome.

Available Sizes: 1 lb., 5 lbs., 10 lbs.

Coverage: 1,000 -2,000 sq. ft./lb. depending on stone.

Product Features:

- Removes medium scratch patterns and chemical etching
- Produces a non-slip finish
- Leaves a superior shine

THOROUGHLY TESTED

Directions:

1. Protect all adjacent surfaces with masking film/plastic.
2. Sprinkle Majestic Honing Powder liberally on the floor, keeping it within the diameter of your pad.

Floor Machine: Position the floor machine with a natural fiber pad on top of the powder. Release enough water from the machine tank to form a heavy cream-like consistency. While working the Honing Powder on the floor, keep a consistent, pre-determined working pattern, as if you were honing with diamond pads, to ensure an even final result.

Right Angle Grinder/Polisher: Use a 7" natural fiber pad, keep the speed at no more than 900 RPM (600RPM is best) and apply strong pressure. Follow a consistent, pre-determined working pattern.

3. Keep the slurry wet. Add powder as needed.
4. Keep working the slurry on the stone surface until the desired result has been achieved.
5. Rinse well and pick up the water using a wet-dry vacuum cleaner.
6. Mop the area with Majestic No-Rinse Neutral Cleaner.
