

# Tenax TeWax Black Paste Wax

Tenax TeWax is used to increase the shine in onyx, marble, natural stones, granite, agglomerates and terrazzo. It also can brighten up stones that have lost their shine. TeWax is the result of pure and black waxes, dissolved through solvents. It allows high penetration levels on treated material leading to a long-lasting effect.

**For Use On:** All stone, rigid, composite and previously sealed and polished surfaces.

**Available Sizes:** Quart

**Product Features:**

- Increases shine on onyx, marble, natural stones, granite, agglomerates and terrazzo
- Allows high penetration levels on treated material leading to a long-lasting effect

## THOROUGHLY TESTED

**Directions:**

The product must be evenly applied on dry and clean materials.

The presence of water, dust or dirt may effect the uniformity of the surface.

1. Spread the product using a sponge or cloth on a clean, dry surface.
2. Let the wax dry for a few minutes.
3. Polish manually with a cloth or steel wool, or polish with an automatic machine.
4. The excess must be removed after the application.

You will obtain an immediate effect.

After usage, close the cans tight. Store the product in a cool place.
