

Majestic Ultra Strip

Ultra Strip is a special blend of water-soluble solvents and surfactants designed to emulsify multiple coats of floor finish. Ultra Strip is effective at removing as many as 10 coats of floor finish.

For Use On: Perfect for floor finish removal on most all hard surface floors such as terrazzo, concrete, marble, granite, slate, and vinyl composition floors. Use only on water and solvent safe surfaces. Not suitable for painted, stained, or wooden floors. Use cautiously on linoleum, rubber, or asphalt tiles as stripper may cause bleaching, softening, or bleeding. Always test in an inconspicuous area prior to general use.

Available Sizes: Quart, case of 12 quarts, gallon, case of 4 gallons, 5 gallon and 55 gallon.

Product Features:

- Quickly removes up to 10 coats of floor finish
- Heavy duty professional formula
- Cost effective

THOROUGHLY TESTED

Directions:

1. For normal problem floors, dilute 1 part stripper to 4 parts warm water. Apply to small inconspicuous test area before doing entire floor. Dilution ratios ranging from 1:4 to 1:10 may be necessary depending on the number of coats of old finish.
2. Using determined dilution ratio, apply to small area of flooring (approx. 50-100 sq. ft.) Permit solution to remain on floor approximately 5 minutes before scrubbing. Do not allow solution to dry on floor.
3. Scrub thoroughly with machine and appropriate stripping pad (contact technical assistance for pad type) based on floor conditions. Pick up solution immediately with wet vac.
4. Rinse well with clean water. Wet vac. Rinse and wet vac again.
5. Make sure all floor finish is thoroughly removed before proceeding with grinding, honing, or polishing. If floor finish or sealer is to be reapplied, ensure floor is completely dry.

Automatic Scrubbers: Use the double pass method for best results. Apply stripping solution, normally 1 part stripper to 10 parts water. (Test in small area prior to stripping floor). Then strip with machine.
